

You have initiated a request to integrate your accounts opened with another financial institution in BT Pay.

If you authorize this integration by pressing the button Set up Open Banking, in BT Pay you will view the IBANs, balance and transaction history from the payment accounts opened with another financial institution.

By granting this authorization, BT will be able to access information about your accounts opened with another financial institution and the transactions' history, without the need for you to re-authorize this access for a period of 90 days.

By authorizing the integration of your accounts in BT Pay, information about them and/or about the transactions carried out through them, which are subject of professional secrecy in the banking field, will be disclosed to BT and, as appropriate, to the providers who support the bank in providing such services. The confidential information may also include personal data about you or those to whom you have made transfers / collected amounts in those accounts. Details about the processing of personal data can be found in the BT Privacy Policy, available on the website [www.bancatransilvania.ro](http://www.bancatransilvania.ro) or, upon your request, in any unit of the bank.

If you have several accounts opened at the specific institution, you will have to associate non BT card added in BT Pay to the corresponding account.

If, at any time, you want to give up your account integration, you will be able to do this by accessing the Card Settings section. From now on, the information about accounts / transaction history / balance from that financial institution will no longer be available in BT.

By accessing the button for set up Open Banking functionality, you express your express consent for the integration in BT Pay of your accounts opened with another financial institution.
